

GLOWY / FLUOR

Fluorescent Embroidery Threads with Luminosity

When Embroideries Glow in the Dark ...

... they must have been stitched with GLOWY or FLUOR! Natural and artificial light is stored in these special threads and released in the dark. Their long lasting luminosity is ideal for logos, letterings or motifs used in the security service industries that need to be visible particularly at night. Fluorescent threads, however, can also create fascinating effects on sportswear or promotional items – for striking logos that are hard to be ignored!

GUNOLD®

GLOWY / FLUOR

Processing Recommendations:

- ◆ **Needle:**
Use standard needle ORGAN No. 75/11 SES.
- ◆ **Bobbin Thread:**
For best results, use BOBBY SYN 130 or BOBBY FIL 110L/130L.

- ◆ **Tip:**
For all patterns designed for embroidery thread 40.

Care Instructions:

Technical Information:

- ◆ **Upper thread with fluorescent effect**
- ◆ **Material:**
100% polyester
- ◆ **Strength 40: Nm 75/2; dtex 133/2**
- ◆ **Colour range:**
GLOWY – 7 different colours (see colour chart)
FLUOR – 1 colour (raw white)
- ◆ **Make-up:**
Cones of 1000 m each
- ◆ **Dispatch and packing size:**
Single cones of 1000 m each

More Important Facts:
The thread's intensity of fluorescence depends on the length of time it has been exposed to light. Depending on the degree of such exposure, the fluorescent effect in the dark will last approx. 15-20 min. Up to 50 washings, there's no loss of luminosity, as official tests have guaranteed.

Product Range – Upper Threads

SULKY®	Viscose thread made of 100% ENKA® viscose, with a silky smooth shine, available in more than 300 colours!
METY	Metal-coated yarn for glamorous, shiny effects.
GLITTER	Glittery foil yarn for shiny and metallic effects.
POLY	Extremely durable yarn made of 100% polyester, highly tear and rub resistant, plus colourfast to chlorine – ideal for working clothes and all heavily-strained items.
COTTY	100% cotton – available in different strengths. Perfect for giving your projects the typical needlework touch!
FILAINE	Embroidery thread made of 100% acrylic, but with a higher degree of tear and rub resistance than wool embroidery threads. Looks like »handstitched«!
MONO	The »transparent« monofilament thread made of 100% polyester – for transparent embroideries and for attaching sequins and ribbons.
SOLAR	Colour-changing polyester yarn: The white yarn changes colour into one of 7 different tones available in natural or artificial UV light.

Professional materials for high-quality embroidery results – tried and tested in the clothing, promotion and home textile industries. For more information visit our website www.gunold.de!
