GLITTER

Metallic Foil Thread

Glittery Foil Yarn for Shiny and Metallic Effects

The new foil yarn GLITTER produces fascinating glittery effects for stunning embroideries. Like a hologram the cut, untwisted yarn surface refracts the light adding brilliance to any embroidery design. Ideal for large-scale designs – in the clothing or accessory trade.

GUNOLD[®]

GLITTER

Processing Recommendations:

- ◆ **Thread Tension:**
As for all metallic threads, a loose thread tension is extremely important.
- ◆ **Thread Unwinding:**
Make sure to slip the provided thread net over the cone before you start embroidering. This will guarantee even thread unwinding.
- ◆ **Needle:**
Use universal needle Organ 75/11 SES or special needle for metallic threads Organ 775 in case of difficulties.

- ◆ **Bobbin Thread:**
For best results, use BOBBY SYN 120 or 130.
- ◆ **Design:**
Particularly effective for large-scale patterns with longer stitches.

Care Instructions:

Technical Information:

- ◆ **Item No. 1411 + Colour Number**
- ◆ **Upper thread**
- ◆ **Material:** 60% polyester, 40% polyethylene
- ◆ **Strength:** Nm 75; dtex 133
- ◆ **Range of colours:**
5 plain shades: gold, silver, red, blue, green,
plus 1 multi-coloured type

Multi-coloured

- ◆ **Make-up:**
Mini-king cones, 1000 m each

Product Range – Upper Threads

SULKY®	Viscose thread made of 100% ENKA® viscose, with a silky smooth shine, available in more than 300 colours!
SILK	Luxurious silk embroidery thread made of 100% pure silk.
METY	Metal-coated yarn for glamorous, shiny effects.
GLITTER	Glittery foil yarn for shiny and metallic effects.
POLY 40	Extremely durable yarn made of 100% polyester, highly tear and rub resistant, plus colourfast to chlorine – ideal for working clothes and all heavily-strained item.
POLY 60	Finest yet durable embroidery thread made of 100% polyester, ideal for small scripts and intricate details, colourfast to chlorine- the right choice for company uniforms or work clothes that are subject to tough industrial conditions.
POLY FIRE	Flame-resistant polyester thread for workwear that is exposed to severe heat and fire.
COTTY	100% cotton – available in different strengths. Perfect for giving your projects the typical needlework touch!
FILAINE	Embroidery thread made of 100% acrylic, but with a higher degree of tear and rub resistance than wool embroidery threads. Looks like »handstitched«!
MONO	The »transparent« monofilament thread made of 100% polyester – for transparent embroideries and for attaching sequins and ribbons.
SOLAR	Colour-changing polyester yarn: The white yarn changes colour into one of 7 different tones available in natural or artificial UV light.
GLOWY	Thread made of 100% polyester that glows in the dark. The thread absorbs natural or artificial light making it fluorescent in the dark – the well-known disco effect!
FLUOR	Thread made of 100% polypropylen that absorbs natural or artificial light, with a yellow-green fluorescence in the dark.

Professional materials for high-quality embroidery results – tried and tested in the clothing, promotion and home textile industries. For more information visit our website www.gunold.de!
