

PUFFY

Embroidery Foam for Three-Dimensional Effects

Truly Outstanding Embroidery Effects!

Bulky, raised monograms, three-dimensional patterns – embroideries made with PUFFY will stun everyone! For creating the enhanced 3D effect. The embroidery design is simply satin-stitched over the foam, giving caps, promotion wear and outerwear a completely new touch.

GUNOLD[®]

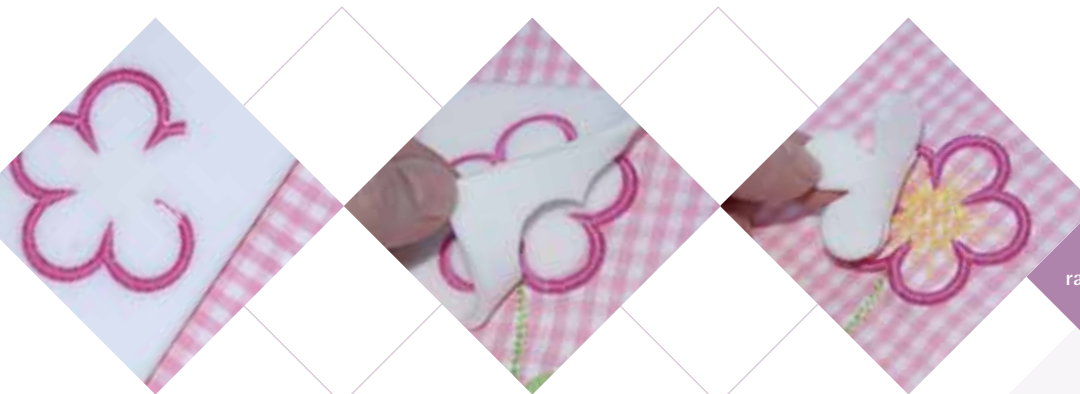

Processing Recommendations:

- ◆ Place PUFFY on the fabric to be embroidered and attach it with adhesive spray KK, if needed.
- ◆ Satin-stitch your design. The machine needle perforates the foam during stitching.
- ◆ A double stitch density instead of the standard setting is essential for completely covering and encasing PUFFY during stitching.
- ◆ Use satin stitches, not fill stitches. The wider the satin stitch, the stronger the 3D effect will be achieved! Step stitches will destroy the foam.
- ◆ A needle with SES point will perforate PUFFY better than needles with sharp points.
- ◆ An extremely strong 3D effect can be achieved by using two layers of PUFFY on the base fabric. If needed, bond it with an adhesive spray.

Care Instructions:

1. Place PUFFY on the fabric to be embroidered, attach it if needed, and start embroidering.

2. During embroidering PUFFY will be perforated...

3. ... and excess foam can simply be torn away. There it is, the amazing 3D effect!

Embroidering with PUFFY is so easy. It's stitching as usual - you only need to punch the desired embroidery design for foam raised embroidery. You'll find all necessary information on this topic in our tips on how to embroider with PUFFY on our website
