SILK

Pure Silk Embroidery Thread

Luxury for Classy Embroideries!

A precious look and matt sheen make SILK embroidery thread quite exceptional already on first sight. Not forgetting that sumptuous feel when touching it: smooth and classy, with the cool luxurious feel silk is known for. SILK embroidery thread is the first-class solution for embroideries on exclusive fabrics and extravagant clothing – ranging from evening wear to luxury lingerie right to cashmere shawls.

GUNOLD[®]

SILK

Processing Recommendations:

- ◆ **Needle:**
Use universal needle ORGAN No. 75/11 SES.
- ◆ **Bobbin Thread:**
With its exclusive silk haptic SILK embroidery thread is particularly classy. For embroideries that have skin contact it's, therefore, absolutely important to use SILK as bobbin thread as well, so the precious touch of silk can be felt on the skin!

- ◆ **Important:**
Silk is a unique natural product. That's why thread strength and weight may have a tolerance of approx. 5%.

Care Instructions:

Product Range – Upper Threads

SULKY®	Viscose thread made of 100% ENKA® viscose, with a silky smooth shine, available in more than 300 colours!
SILK	Luxurious silk embroidery thread made of 100% pure silk.
METY	Metal-coated yarn for glamorous, shiny effects.
GLITTER	Glittery foil yarn for shiny and metallic effects.
POLY 40	Extremely durable yarn made of 100% polyester, highly tear and rub resistant, plus colourfast to chlorine – ideal for working clothes and all heavily-strained item.
POLY 60	Finest yet durable embroidery thread made of 100% polyester, ideal for small scripts and intricate details, colourfast to chlorine- the right choice for company uniforms or work clothes that are subject to tough industrial conditions.
POLY FIRE	Flame-resistant polyester thread for workwear that is exposed to severe heat and fire.
COTTY	100% cotton – available in different strengths. Perfect for giving your projects the typical needlework touch!
FILAINE	Embroidery thread made of 100% acrylic, but with a higher degree of tear and rub resistance than wool embroidery threads. Looks like »handstitched«!
MONO	The »transparent« monofilament thread made of 100% polyester – for transparent embroideries and for attaching sequins and ribbons.
SOLAR	Colour-changing polyester yarn: The white yarn changes colour into one of 7 different tones available in natural or artificial UV light.
GLOWY	Thread made of 100% polyester that glows in the dark. The thread absorbs natural or artificial light making it fluorescent in the dark – the well-known disco effect!
FLUOR	Thread made of 100% polypropylen that absorbs natural or artificial light, with a yellow-green fluorescence in the dark.

Professional materials for high-quality embroidery results – tried and tested in the clothing, promotion and home textile industries. For more information visit our website www.gunold.de!
