

◆ Adhesive Spray

# KK 100

Transparent Temporary Adhesive Spray

## For Temporary Fixation

The adhesive spray KK 100 fixes stretchy fabrics and knitwear and thus prevents warping of the knitwear during the embroidery process. It is ideal for holding die-cuts in place for appliqués and small pre-cut parts, such as trouser pockets and collars for further processing. Delicate items that you don't want to hoop to avoid pressure marks can be easily positioned for embroidery. Smooth fabrics are prevented from slipping by fixing with KK 100.

# KK 100

## Main Use:

- ◆ **Stretchable fabrics and knitwear:** to prevent warping of knitwear, use KK 100 to temporarily bond STIFFY embroidery nonwoven and fabric.
- ◆ **Appliqués:** KK 100 fixes appliqués accurately for the embroidery process.
- ◆ **Smooth fabrics:** KK 100 prevents smooth fabrics from slipping - spray on embroidery nonwoven and press-on fabric.
- ◆ **Cuts:** KK 100 secures cuts on the embroidery nonwoven - ideal for trouser pockets, collars, ...
- ◆ **Pieces which you do not want to hoop in order to avoid pressure marks.** Hoop STIFFY embroidery nonwoven, spray with KK 100, secure parts to be embroidered.

## Recommended Processing:

- ◆ Shake before use. Always spray away from the body. Observe the safety instructions on the can.
- ◆ KK 100 is suitable for all textile fabrics and many porous materials.
- ◆ Keep the bottle as upright as possible and at a distance of 30cm away from the fabric.
- ◆ To ensure the correct distribution of the adhesive, push down the spray button as far as possible.
- ◆ **Allow the adhesive to dry for 30 seconds before gluing.**
- ◆ The adhesive strength can vary slightly depending on the nature or treatment of the fabric. Textile fabrics often contain finishes and the adhesive strength is increased if the fabric has been ironed beforehand.
- ◆ KK 100 leaves no stains when handled correctly, even on delicate fabrics. Nevertheless, it is always advisable to carry out a preliminary test with the fabric or material that you want to process.

## Technical Specifications:

- ◆ **Composition:**  
Adhesive: Vinyl acetate polymer Solvent: Methylal  
Propellant gas (aerosol): dimethyl ether (DME)
- ◆ **Colour:** transparent
- ◆ **Acid value:** acid-free
- ◆ KK 100 is non-toxic, almost odourless, flammable
- ◆ **Packaging:** 500 ml cans
- ◆ **Shipping and packaging size:**  
Single cans or carton of 12 cans

- ◆ **Tip:**  
Store spray at room temperature for 24 hours prior to application.
