

ONE-ON-ONE EMBROIDERY DYING AFTER EMBROIDERING

Do you wish the embroidery to have the exact same color as the fabric?
Then the embroidery needs to be done before dyeing.

What you should consider:

Fabric and embroidery thread must be of the same material or must be dyed with the same dyes. The following list will help you decide which thread to use for what fabric.

| Fabric | Embroidery Thread |
|-----------------------|--|
| Mercerized cotton | COTTY or SULKY |
| Non mercerized cotton | COTTY or SULKY (Note: here the embroidery is somewhat darker than the fabric) |
| Polyester/Cotton | COTTY or POLY |
| Polyester | POLY |

For tone-on-tone embroidery you must always order raw yarn. Neither white nor dyed yarns are suitable for this purpose

SULKY raw yarn (color no. 1071) is always in stock.
We can supply COTTY and POLY raw yarn as well. Specify the quantity then we will let you know the delivery time.
